

PROFESSIONAL SUMMARY

Analytical Statistics student with a strong foundation in biostatistical modeling and data management. Proven track record in conducting Exploratory Data Analysis (EDA) and predictive modeling for health-related datasets. Seeking to leverage expertise in SPSS, Python, and regression analysis to support the ACROSS-BD project in improving outcomes for patients with coronary heart disease.

TECHNICAL SKILLS

Statistical Analysis: Regression analysis, Hypothesis testing, Probability theory, and Quantitative Research.

Software & Tools: SPSS, Python (NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn), SQL and MS Office

Data Management: Data cleaning, normalization, and maintaining high-quality research datasets.

Research Skills: Literature review, technical report writing, and insight dissemination.

PROJECTS

Heart Disease Prediction App | Statistical Classification | [LINK](#)

- Developed an end-to-end machine learning application to predict heart disease risk based on clinical parameters like ECG results, cholesterol and blood pressure.
- Implemented a full data workflow: preprocessing, encoding, and feature scaling.

Spam Message Detection App | NLP & SMS classification | [LINK](#)

- Built an automated text classification tool to detect fraudulent messages using natural language processing (NLP).
- Demonstrated proficiency in cleaning and managing unstructured text data, a skill directly applicable to literature reviews and qualitative research.

Submarine Sonar Object Prediction | Statistical Classification | [LINK](#)

- Processed complex radar datasets through rigorous preprocessing and normalization, achieving 85% accuracy.
- Applied Logistic Regression to ensure predictive stability, a methodology directly applicable to clinical trial data.

Ad Click Prediction | Predictive Modeling | [LINK](#)

- Achieved 98% classification accuracy using statistical modeling to identify potential target groups.
- Managed high-reliability while minimizing errors, demonstrating the precision required for NIHR-funded projects.

EXPERIENCE

Project Manager | Dhaka College Data Analytics Club

(May 2024–Nov2024)

As Project Manager at DCDAC, I spearhead innovative projects, inspire teams, and drive hands-on learning in data analytics. I have mastered leadership, strategic execution, and collaboration while delivering impactful solutions.

Committee Member | Volunteer for Bangladesh Dhaka District

(Oct 2024–Present)

As a committee member of volunteer for Bangladesh, I spearhead events strategize initiatives and mobilize teams to create meaningful social impact. I have optimized leadership, coordinated diverse projects to drive community transformation effectively.

Management Trainee | Business Development Department | YSSE

(Nov 2024–July 2025)

As a Business Development Intern at YSSE, I forge partnerships, analyze markets, and craft strategies to growth. I have enhanced my expertise in negotiation, innovation, and collaboration while delivering impactful solutions to expand organizational reach.

Mover | Bangladesh Mathematics Olympiad

(Jan 2024–Present)

Led nationwide math Olympiad events, streamlining logistics and driving successful execution, ensuring seamless operations. Partnered with teams to ignite young minds and promote mathematical achievement.

EDUCATION

Bachelor of Science in Statistics | Dhaka College | CGPA: 3.25

(2022–Ongoing)

Statistics major specializing in Machine Learning, Deep Learning, and Exploratory Data Analysis. Expert at utilizing Python and SQL to bridge the gap between theoretical statistics and practical, high-impact technical solutions.

Higher Secondary Certificate | National College of Education | GPA: 4.92

(2019–2021)

I Completed my HSC in science, creating a passion for making changes. Rigorous academic pursuits honed my analytical skills and problem-solving abilities.
